

Loesch Custom Bow Grips

The Loesch grips, already a favourite among top competitors in both 3D and target in the U.S.A, now finally available in Europe also. We have selected these superb grips to enable you to experience the best possible grip for your bow.

15750 Loesch Half Grip Low
for Hoyt Tec Series

15752 Loesch Half Grip Medium
for Hoyt Tec Series

If you do like the quality of the Hoyt Tec series but have not found the extreme low grip angle to be very comfortable than try this grip.

15760 Loesch Side Plates for Mathews

15762 Loesch Side Plates for PSE Mach 10, 11 etc

Many pro's choose to shoot a grip as narrow as possible to avoid torque and to improve accuracy.

15770 Loesch Full Grip for Mathews

15772 Loesch Full Grip for PSE Mach 10,11 etc

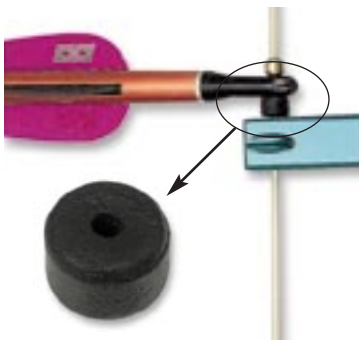

15780 Loesch Full Grip Low for Hoyt Avalon

15781 Loesch Full Grip Medium for Hoyt Avalon

15782 Loesch Full Grip Medium/High

for Hoyt Avalon

The most comfortable grip available, specifically made for each different bow model.

46200 Neet Eliminator Button

Rubber button avoids contact between release and arrow

46210 Neet Speed Button

15855 Cascade Cable Adjuster

Now you can adjust cable-length easily for optimum wheel-timing.

15800 WallBanger Draw Stop HTPC

For Hoyt accu wheel, command cam & power cam.

15802 WallBanger Draw Stop HTEW

For Hoyt energy wheel & command cam '97.

15804 WallBanger Draw Stop HTMC

For Hoyt mastercam and advanced cam.

15806 WallBanger Draw Stop PS

Fits most PSE bows.

This unique device will give you the hardest draw stop possible. It will help you in getting more consistent draw length and developing better back tension. Because it is adjustable you can vary your let-off and create very precise draw length. Lightweight.

15850 Vital CenterShot Spreader Bar

This device eliminates the need for a cable guard. It eliminates bow torque and improves accuracy. It is easy to install and can be tied in securely. Made from lightweight aluminum.
