

# V-BARS & EXTENDERS

**26010 Black Sheep V-Bar**  
Best value in V-Bar's. Strong, yet lightweight design. \*Straight, angled

**26014 Black Sheep E/E V-Bar**  
To be clamped around stabilizer. Will fit Black Sheep stabilizers.

**26100 Cavalier J-Bar**  
Wide, one piece design. Personal choice of Jay Barrs. \*Straight, angled.

**26020 AGF V-Bar**  
This V-Bar features a three unit design for easy assembly. \*5/16, M8

**26040 AGF T-Bar Adjustable**  
Combination of V-Bar and extension.

**26110 Easton V-Bar**  
\*Straight, angled

**25700 Black Sheep Carbon Extender**  
\*3", 4", 5"

**25720 AGF Extender**  
\*3", 5"

**25780 Win & Win Fomax Extender**  
\*3", 4", 5"

**25790 Beiter Extender Blue**  
25791 Beiter Extender Black & White  
\*4", 5", 6"

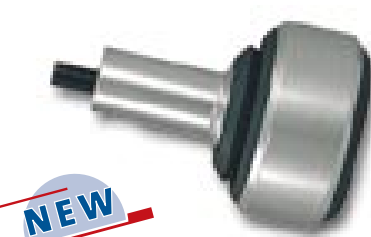

**25740 Easton ACE Extender**  
\*4", 5"

**27100 Bernardini TFC**  
To be coupled with long stabilizer or short 3D stabilizer, mostly used on compounds.

**28070 Doinker Doe-Nut**  
Slide the Doe-Nut over your stabilizer and adjust the position to get the best dampening possible. Includes three different weight rings.

**15885 Sims Enhancer 2000 - 3"**  
To be coupled with long stabilizer. Will not affect performance of your long stabilizer.  
\*Black, silver

**15887 Sims Enhancer 2000 Short - 2"**  
Keeps weight as close to the bow as possible. Vibration reduction up to 60%.  
\*Black, silver
