*Black, natural, gold, bronze.
Smallest diameter.

41040 Brownell Fast Flight S4 Thin
New, improved thinner version for a better balanced bowstring.
*Black, natural, purple, red, teal, blue.

New string materials

Commercial string materials have developed from B50 to Kevlar and then Fast Flight. We are now in the next generation of string materials with stronger, better shooting products such as BCY Dyna 8125 and Brownell D75. Both these materials offer superior performance in comparison with regular FastFlight. For a non-stretch, non-creep compound string material you now have a choice in several blended string materials such as BCY 450 Plus and Brownell Ultra Cam, the new standard in compound string materials.

String material comparison chart

Material	Breaking Strength (single strand)	Diameter
Brownell B50	50 pounds	0.018
Brownell Traditional	54 pounds	0.019
Brownell FastFlight	95 pounds	0.018
BCY Dyna 8125	120 pounds	0.018
Brownell D75	130 pounds	0.016
Brownell S4	160 pounds	0.023
BCY 450 Plus	155 pounds	0.021
Brownell Ultra Cam	125 pounds	0.012

12

42000 J.V.D. Bowstring B50
White 10 strands or 12 strands:
48", 54", 62", 64", 66", 68", 70"
Black 14 strands: 48", 58", 60", 64"
42020 J.V.D. Bowstring B50 Longbow
Black 14 strands or 16 strands:
68", 69"

42100 Zebra "ZS" String Under 65"
42105 Zebra "ZS" String Over 65"
These strings combine bundles of multi-filament strands, counter twisted to form a perfectly balanced bowstring that does not rotate as the bow is drawn. You will not need rubber tubing or other string alignment devices. These are the finest bowstrings.

42110 Tiger "ZS" String Under 65"
42115 Tiger "ZS" String Over 65"
Made from a new no-stretch string material for the best consistency possible.

44000 Black Sheep String Server
Most economical string server available.

44020 Bengston String Server
Most popular string server available, the original.

44040 Cavalier String Server
Very durable string server that is also perfect for larger diameter serving materials.

44060 Spigarelli String Server

44080 Beiter String Server
A true innovation in string servers. The very best available because of consistent tension.

46500 J.V.D. Kisser
46520 Neet Kisser
46540 Flex Fletch Kisser *1,0 or 1,4 cm.

43000 Bengston Wax
Popular wax for years already.

43020 Bohning Tex-Tite Wax
Bow string wax designed for synthetic fiber bows.

43040 Bohning Seal-Tite Wax
Silicone based wax for treating the new high tensile strength bow string materials.

46000 Saunders Nockpoint
Very easy to install nockpoints.
*Small, medium, large

46300 Super Nockpoint Pliers
Most economical nockpoint pliers available.

46320 Saunders Nockpoint Pliers
Fits all sizes of Saunders nockpoints. Tip opens nockpoint for removal or repositioning.

46345 Adams Nockpoint Pliers Steel
Superb nockpoint pliers that allow easy installation and removal of nockpoints.

46020 Beiter Nockpoint
 * #1, #2, 1/4, 9/32
 These nockpoints have to be served in and will fit the Beiter nocks

46100 T.R.U. Speed Loop
 Unique nockpoint designed to eliminate nock pinch at full draw and to align peep sight. *Standard, "G"

46120 T.R.U. Speed-Nok
 Very lightweight nockpoint that will align peep sight. Will not slip on bowstring.

46130 T.R.U. Tru Nok with Peep Aligner
 *Standard, "G"

45000 J.V.D. Bow Square
 Bow square that features a scale on both sides making it ideal for both RH and LH archers.

45020 Super Bow Square TG-500

45040 Super Bow Square Deluxe TG-505
 This is a copy from one of the most popular bow squares on the market.

45060 Bengston Bow Square
 A very popular bow square with scale in both inches and centimeters.

44440 Spigarelli String Jig
 String jig with unique length adjustment that results in very consistent string lengths

44200 Neet U-Serve String and Cable Separator
 Easiest way to change your center serving or to install a peep sight.

44400 Arten String Jig
 Good quality, inexpensive string jig.

44220 Cardoza EZ String Separator
